

The next international conference on Advancements in Nuclear Instrumentation Measurement Methods and their Applications ANIMMA 2019 (www.animma.com) will be held at Grand Hotel Saint Bernardin in Portorož, Slovenia from June 17th to 21st 2019 (see attached announcement poster).

ANIMMA 2019 is the sixth of a series of conferences devoted to endorsing and promoting scientific and technical activities based on nuclear instrumentation and measurements. The main objective of the conference is to unite the various scientific communities not only involved in nuclear instrumentation and measurements, but also in their wide fields of applications such as fundamental physics, nuclear medicine, medical and environmental sciences. The conference is all about getting scientists, engineers, students and the industry to meet, exchange cultures and identify new scientific and technical prospects to help overcome both current and future unresolved issues. The ANIMMA conference provides scientists and engineers with a veritable opportunity to compare their latest research and development in different areas: physics, nuclear energy, nuclear fuel cycle, safety, security, future energies (GEN III+, GENIV, ITER...), medical and environmental sciences.

The ANIMMA 2019 topics slightly updated include instrumentation and measurement for:

- Fundamental Physics
- Fusion diagnostics and technology
- Nuclear Power Reactors Monitoring and Control
- Research reactors
- Nuclear Fuel Cycle
- Decommissioning, dismantling and remote handling
- Safeguards, Homeland Security
- Severe accidents monitoring
- Environmental and Medical Sciences
- Education, Training and Outreach

ANIMMA will celebrate its 10th anniversary on June 2019 !

The Call for Papers and more details will be issued shortly. .
