Regulation and standardization altogether ?

- Standardization precedes regulation and is piloted by standardization bodies
- Regulation is elaborated by institutions with political accountability
- Regulation is a generic word : covers, from a legal point of view, different types of legal instruments with legal effects (regulations, directives, decisions) and without legal effects (opinion, recommendation, guidelines) and hybrid legal instruments (some codes of conduct)
- Bridge between standardization and regulation is made from a legal perspective through the TRIS notification system

TRIS NOTIFICATION SYSTEM IN SHORT

Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on Information Society services

Procedure implementing :

- A right to be informed
- A right to be heard

Standstill period of 3 months – Draft can be blocked from 12 months to 18 months if EU harmonisation on the way

Urgent procedure possible
