

European Centre for Risk Management and Safe Innovation in Nanomaterials & Nanotechnologies (EC4SafeNano) Workshop

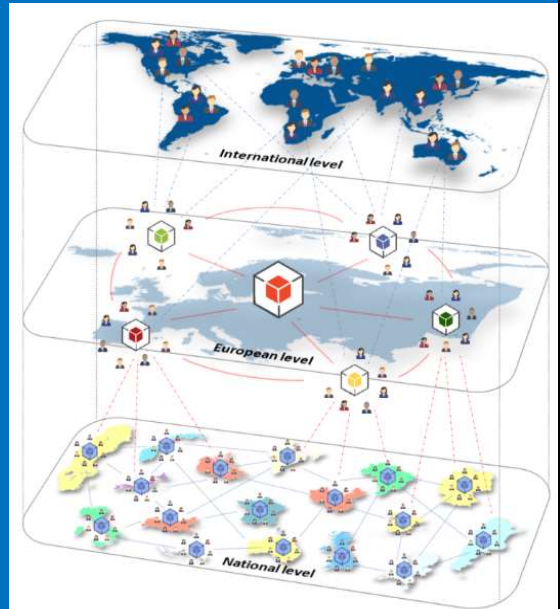

Blueprint for Nanosafety Platform Development & Sustainability (BNP-DS)

EC4SafeNano

This is a EU-funded project for the development of a distributed Centre of European organizations offering services for Risk Management and Safe Innovation for Nanomaterials & Nanotechnologies (EC4SafeNano). The center will be structured as a hub-based network and will work with established platforms and centers of excellence for nanosafety across Europe and internationally.

The EC4SafeNano network members can:

- o access resources to start a new or develop an existing nanosafety platform.
- o exchange/interact with experts on one platform.
- o consult on needs, resources and services.
- o harmonize nanosafety related practices on EU-wide scale.
- o have EU-wide acceptance of the study results in recognition with EC4SafeNano.
- o access various workshops or activities organized by other network members.

BNP-DS workshop

- o BNP-DS will focus on the production of a blueprint (a set of guidelines for do's and don'ts) for the development and sustainability of a nanosafety platform.
- o It will be an interactive session between the representatives of various nanosafety platforms and other stake holders.
- o It is a first step towards the development of EC4SafeNano network for nanosafety platforms.

Interested? Join us at the workshop...

On Monday, 5 November 2018
From 13h to 15h

At
nanoSAFE 2018 Conference (5-9 Nov 2018)
Maison MINATEC®, Parvis Louis Néel, 38054 Grenoble, FRANCE

For more information, please contact

Project coordinator:

Dr. Emeric Frejafon, INERIS (France)
emerich.frejafon@ineris.fr, Tel: +33 (0) 3 44 55 63 13

Task leader:

Dr. Neeraj Shandilya, TNO (The Netherlands)
neeraj.shandilya@tno.nl, Tel: +31 (0) 8 88 66 37 56

The EC4SafeNano project receives 2 M€ funding from the EU's H2020 research and innovation program under grant agreement No 723623.
