

The Department of Cellular and Molecular Radiobiology (DRF/JACOB/DRCM, U1274-UMRE008 Inserm - CEA - Université Paris-Saclay - Université Paris Cité), located at the CEA site in Fontenay-aux-Roses (France), is seeking to recruit an outstanding researcher in the broad areas of **genome stability** or **stem cell biology**.

We welcome applications from internationally recognized scientists with an established track record of scientific excellence and innovation. We are particularly interested in applicants whose research will **strengthen and expand the Department's expertise while fostering new scientific directions** at the interface of genome stability and stem cell biology with radiobiology and related disciplines. Candidates should demonstrate the ability to develop ambitious and innovative research programmes.

The Department offers an internationally competitive research environment, state-of-the-art facilities, and strong interactions with leading national and international partners. The successful candidate will initially join one of the Department's existing research teams as a project leader and contribute to a vibrant, multidisciplinary research environment. Depending on the candidate's profile and career development, the position provides opportunities to develop new research initiatives and establish and lead an independent research team within the Department.

Applications from outstanding researchers worldwide are strongly encouraged. We are committed to fostering excellence, scientific creativity, and an inclusive research environment.

Applications should be submitted as a single PDF file, including:

- cover letter
- curriculum vitae
- full list of publications
- 2-page summary of scientific achievements
- 3-page research proposal describing the candidate's future research programme
- contact information for three referees

Applications should be sent to: secretariat-u1274@cea.fr

Application deadline: September 30, 2026

Interviews of shortlisted candidates: November 2026

Expected start date: First quarter of 2027

Prospective applicants are welcome to contact the Department and the relevant team leaders for further information or informal enquiries.
